

BUILDING INFORMATION SYSTEMS

M. Rasti-Barzoki

rasti.iut.ac.ir

92-2

Learning Objectives

- What are the core activities in the systems development process?
- What are the principal methodologies for modeling and designing systems?

مثال

• ساخت بنا

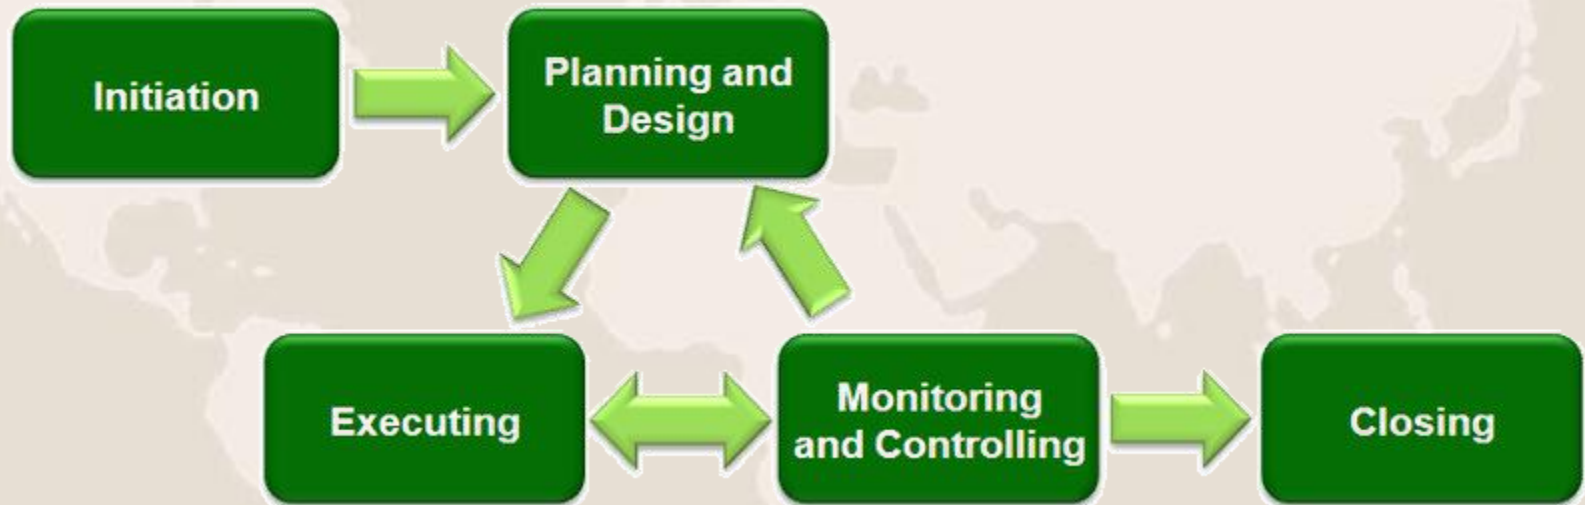

– بلافاصله

– پیمانکار اجرایی

– معمار

Typical development phases of a project

Management Information Systems

BUILDING INFORMATION SYSTEMS

Project Life Cycle

Defining

1. Goals
2. Specifications
3. Tasks
4. Responsibilities

Planning

1. Schedules
2. Budgets
3. Resources
4. Risks
5. Staffing

Executing

1. Status reports
2. Changes
3. Quality
4. Forecasts

Closure

1. Train customer
2. Transfer documents
3. Release resources
4. Evaluation
5. Lessons learned

Overview of Systems Development

- **Systems development:**
 - **Activities that go into producing an information system solution to an organizational problem or opportunity**
 1. **Systems analysis**
 2. **Systems design**
 3. **Programming**
 4. **Testing**
 5. **Conversion**
 6. **Production and maintenance**

Management Information Systems

BUILDING INFORMATION SYSTEMS

Overview of Systems Development

Building a system can be broken down into six core activities.

Overview of Systems Development

- **Systems analysis**
 - **Analysis of problem to be solved by new system**
 - Defining the problem and identifying causes
 - Specifying solutions/ alternative solutions
 - Identifying information requirements
 - Who needs what information, where, when, and how
 - Define objectives of new/modified system
 - Detail the functions new system must perform
 - **Includes feasibility study**
 - Is solution feasible and good investment?
 - Is required technology, skill available?

• تحلیل گر سیستم

– واسطه بین مشتری (کاربر نهایی) و سازنده (برنامه نویس)

Overview of Systems Development

- **Systems design**
 - **Describes system specifications that will deliver functions identified during systems analysis**
 - **Should address all managerial, organizational, and technological components of system solution**
 - **Role of end users**
 - User information requirements drive system building
 - Users must have sufficient control over design process to ensure system reflects their business priorities and information needs
 - Insufficient user involvement in design effort is major cause of system failure

Overview of Systems Development

- **Programming**
 - System specifications from design stage are translated into software program code
- **Testing**
 - Ensures system produces right results
 - **Unit testing:** Tests each program in system separately
 - **System testing:** Test functioning of system as a whole
 - **Acceptance testing:** Makes sure system is ready to be used in production setting
 - **Test plan:** All preparations for series of tests

Overview of Systems Development

- **Conversion**
 - **Process of changing from old system to new system**
 - **Four main strategies**
 1. Parallel strategy
 2. Direct cutover
 3. Pilot study
 4. Phased approach
 - **Requires end-user training**
 - **Finalization of detailed documentation showing how system works from technical and end-user standpoint**

Overview of Systems Development

- **Production and maintenance**
 - **System reviewed to determine if revisions needed**
 - **Maintenance**
 - Changes in hardware, software, documentation, or procedures to a production system to correct errors, meet new requirements, or improve processing efficiency
 - 20% debugging, emergency work
 - 20% changes to hardware, software, data, reporting
 - 60% of work: User enhancements, improving documentation, recoding for greater processing efficiency

Overview of Systems Development

SUMMARY OF SYSTEMS DEVELOPMENT ACTIVITIES	
CORE ACTIVITY	DESCRIPTION
Systems analysis	Identify problem(s) Specify solutions Establish information requirements
Systems design	Create design specifications
Programming	Translate design specifications into code
Testing	Unit test Systems test Acceptance test
Conversion	Plan conversion Prepare documentation Train users and technical staff
Production and maintenance	Operate the system Evaluate the system Modify the system

متدلوژی Methodology

- مجموعه ای از روش ها، قواعد و اصولی که در یک رشته به کار می روند.
 - مجموعه ای از روش ها که بر مبنای مجموعه ای از اصول پایه به همراه قواعدی برای کاربرد آنها بنا شده اند.
 - راهبردهای مشخص و مرحله به مرحله برای تکمیل یک یا چند دوره از چرخه عمر ایجاد و توسعه سیستم ها
- توسعه دهندگان سیستم با اجرای گام به گام مراحل مشخص شده در متدلوژی ها و استفاده از ابزارها و تکنیک های هر مرحله، پروژه های توسعه IS ها را برنامه ریزی، اداره و کنترل و ارزیابی نمایند.

سوالاتی که یک متدلوژی باید پاسخ دهد:

• چگونه یک پروژه باید به مراحل فرعی تجزیه شود؟

• در هر مرحله

– چه اقداماتی باید صورت گیرد؟

– چه فروجی هایی باید تولید شود؟

– چه محدودیت هایی باید اعمال شود؟

– چه کسانی باید درگیر شوند؟

– از چه ابزارهایی باید استفاده شود؟

Development Disciplines

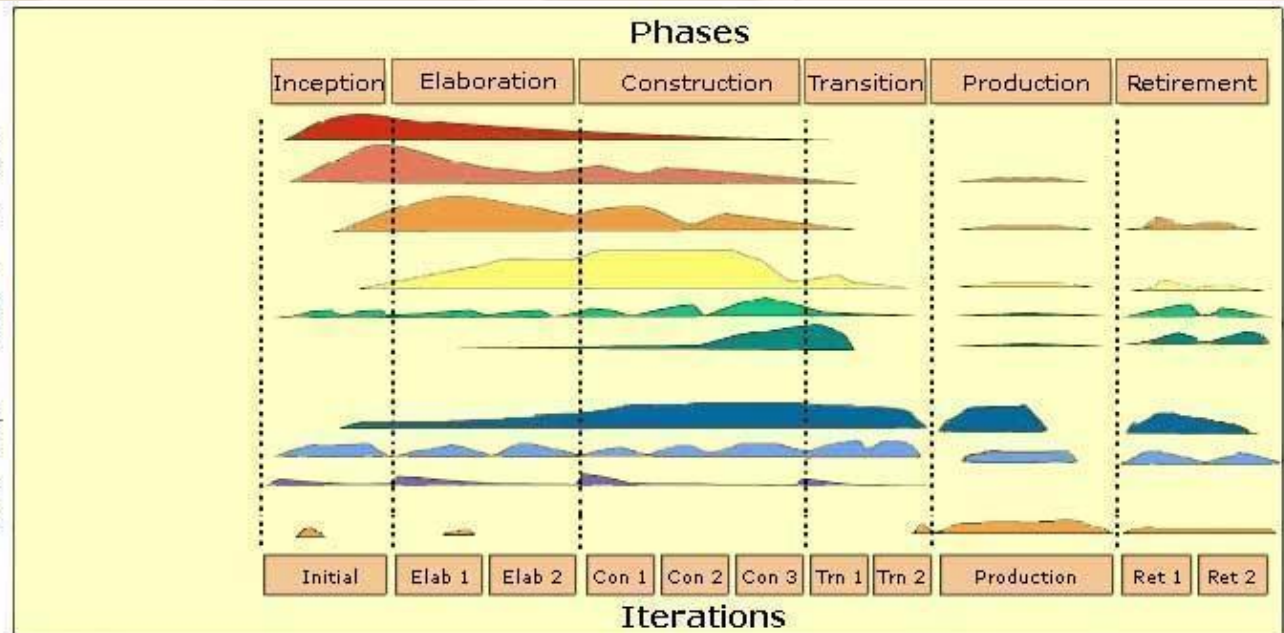

- Business Modeling
- Requirements
- Analysis & Design
- Implementation
- Test
- Deployment

Support Disciplines

- Configuration and Change Mgmt.
- Project Management
- Environment
- Operations & Support

Enterprise Disciplines

- Enterprise Business Modeling
- Portfolio Management
- Enterprise Architecture
- Strategic Reuse
- People Management
- Enterprise Administration
- Software Process Improvement

SSADM

- 1980: Central Computer and Telecommunications Agency (CCTA) evaluate analysis and design methods.
- 1981: Consultants working for Learmonth & Burchett Management Systems,
- 1983: SSADM made mandatory for all new information system developments
- 1984: Version 2 of SSADM released
- 1986: Version 3 of SSADM released, adopted by NCC
- 1988: SSADM Certificate of Proficiency launched, SSADM promoted as 'open' standard
- 1989: Moves towards Euromethod, launch of CASE products certification scheme
- 1990: Version 4 launched
- 1993: SSADM V4 Standard and Tools Conformance Scheme Launched
- 1995: SSADM V4+ announced, V4.2 launched
- 2000: CCTA renamed SSADM as "Business System Development". The method was repackaged into 15 modules and another 6 modules were added.

پیامبر صلی اللہ علیہ وآلہ:

الصیغہ نزل برزقہ رویمہ کل بندوبست اہل البیت

مہمان، روزی خود رومی آورد و کنائمان اہل خانہ رومی برد.

تمف العقول، ص ۳۶۱
